

200/400 Club Report

27-September-2016

The criterion to determine entry into the 200 or 400 club has traditionally been an athlete's best formula total meeting or exceeding 200 or 400. The formula total was calculated using the Sinclair formula for the given quad and the Malone-Meltzer age coefficients. This total has been known as the SMM total. In recent years a growing disparity in performances from one quad to the next simply due to the changes in the Sinclair formula in recent quads was recognized. When the Malone-Meltzer age coefficients were replaced by the Meltzer-Faber age coefficients in 2015 the decision was made to recalculate the formula totals using the Sinclair formula from the 2013-2016 quad and new Meltzer-Faber coefficients applied to all previous years. The newer SMF totals are for most athletes higher than the previous SMM totals. However, in a few cases the SMF totals are lower. The result is that a few athletes whose SMM total was sufficient to become a member of the 200 or 400 club are no longer members based on their best SMF total. To appropriately honor these athletes the 200 and 400 clubs feature a legacy list of athletes who were once members.
